MUSTAFA ELTALIB

Software Developer

Phone: +966532001307 KSA ,Riyadh Email: eltalib.dev@gmail.com Linkedin: /mustafa-eltalib

SUMMARY

Full Stack Software Engineer with 4+ years of experience building scalable web applications using Python, JavaScript, TypeScript, React, Node.js, SQL, and REST APIs. Experienced throughout the software development lifecycle, including system design, testing, debugging, deployment, and performance optimization. Passionate about writing clean, maintainable code and delivering high-quality software in Agile environments.

WORK EXPERIENCE

Software Developer | DAL Group LLC – Dubai, UAE | Aug 2022 – Apr 2026

- Developed and maintained enterprise applications using React.js, JavaScript, SQL Server, and REST APIs.
- Built and maintained database-driven solutions, improving data accuracy, reporting efficiency, and business process automation using SQL and enterprise systems.
- Developed system configurations, integrations, and application enhancements to support inventory management, transactions, and operational workflows.
- Supported full software development lifecycle activities including design, development, testing, deployment, troubleshooting, and system improvements.
- Created interactive Power BI dashboards and data-driven reports to monitor KPIs, system performance, and operational metrics, reducing manual reporting efforts by 60%.
- Collaborated with cross-functional Agile teams to translate business requirements into scalable, maintainable software solutions.
- Designed technical documentation, workflows, and process improvements to improve communication between technical and non-technical stakeholders.
- Developed reusable and maintainable components following clean coding principles and best practices.
- Designed scalable RESTful APIs and database schemas to support business requirements and future growth.
- Refactored existing codebases to improve readability, maintainability, and overall application performance
- Designed and consumed RESTful APIs to integrate frontend applications with backend services.
- Collaborated using Git for version control, feature branching, code reviews, and team-based development.

Software Developer | Hajtak Technology - Khartoum , Sudan | Sep 2021 - Jun 2022

- Developed and optimized modern web applications using React.js, JavaScript, Bootstrap, Tailwind CSS, and REST API integrations, improving frontend performance, responsiveness, and user experience.
- Built scalable and reusable React component-based architectures, improving maintainability, code reuse, and development efficiency across multiple applications.
- Led end-to-end development of e-commerce and business web applications, implementing responsive UI designs, frontend integrations, and performance optimizations that improved conversion rates by 30%.
- Designed and delivered 5+ client web solutions by gathering requirements, translating business needs into technical implementations, and developing production-ready applications.
- Improved application performance by optimizing frontend code, rendering processes, API interactions, and UI components, achieving a 40% improvement in responsiveness.
- Managed application deployment workflows, including hosting configuration, domain setup, production releases, and performance monitoring, maintaining 99% application availability.
- Applied web optimization practices including SEO, accessibility, and performance improvements, increasing search visibility and organic traffic by 60%.
- Collaborated with clients and development teams to deliver clean, maintainable solutions following modern software development practices.
- Tested REST APIs using Postman to validate endpoints, request handling, authentication, and error responses.
- Verified application functionality across multiple browsers and devices to ensure consistent user experience.

Software Developer | TPRA (Telecommunication and Post Regulatory Authority) | Khartoum , Sudan | Mar 2019 - Mar 2020

- Developed and deployed an asset tracking system using C#, ASP.NET MVC, SQL Server, and Bootstrap, improving inventory management and reducing hardware loss by 15%.
- Built and maintained full-stack application features across frontend and backend layers, implementing MVC architecture, CRUD operations, database design, and responsive UI development.
- Designed database structures, optimized queries, and implemented reporting workflows to improve asset tracking accuracy and operational efficiency by 30%.
- Developed responsive user interfaces using HTML, CSS, JavaScript, and Bootstrap, improving usability and accessibility across internal business applications.
- Participated in the full software development lifecycle including requirements analysis, development, testing, debugging, deployment, and system enhancements.
- Applied software engineering best practices including clean code principles, maintainable architecture, and structured development workflows.
- Supported technical knowledge sharing by delivering training on programming fundamentals, software development practices, and application workflows.
- Debugged and resolved frontend and backend issues using browser developer tools and logging techniques.
- Implemented MVC architecture and component-based frontend design to improve application maintainability.

EDUCATION

Bachelor of Computer Applications
University of Hamdard, India

SKILLS

Python, JavaScript, TypeScript, React.js, Node.js, C#, ASP.NET MVC, SQL, REST API Development, HTML5, CSS3, Tailwind CSS, Bootstrap, Git, Docker, Postman, SQL Server, MySQL, Authentication (JWT, OAuth), Database Design, Query Optimization, CI/CD, Microservices Architecture, Performance Optimization, Agile/Scrum, Cross-functional Collaboration, API Testing

CERTIFICATIONS

- Power BI in Data Analysis
- Inventory Risk Management
- Advanced Python Development

LANGUAGES

Arabic - Native
English - Professional
